RECEIVED

SOUTH CAROLINA
PUBLIC SERVICE
COMMISSION

This matter comes before the Public Service Commission of South Carolina (the Commission) on the request of Matrix Telecom, Inc. (Matrix or the Company) for approval of a modification of the Company's name by which it will be doing business in South Carolina. Matrix proposes to adopt Matrix Business Technologies as a "doing business as" (d/b/a) or trade name with regard to offering telecommunications services in South Carolina.

A review of Docket No. 1990-517-C reveals that Matrix was granted authority to provide resold interexchange telecommunications services in South Carolina by Commission Order No. 90-1176, dated December 19, 1990, in the Company's former name, Matrix Telecom d/b/a Phone\$ave. By Order No. 94-947, dated September 14,

1994, the Commission approved a change in the Company's name to its present name, Matrix Telecom, Inc.

A review of Docket No. 2005-98-C reveals that Matrix has also been granted authority to provide local exchange telecommunications services in South Carolina by the authority granted to Matrix in Commission Order No. 2005-449, dated August 25, 2005.

Upon receipt of Matrix's request, the Commission's Docketing Department instructed the Company to publish, one time, a Notice of Filing in newspapers of general circulation in the areas of the state affected by the request. The purpose of the Notice of Filing was to inform interested parties of the request of Matrix and of the manner and time in which to file the appropriate pleadings for participation in the proceeding. The Company complied with this instruction and provided the Commission with proof of publication of the Notice of Filing. No protests or Petitions to Intervene were received.

By letter from the Company's Manager of Regulatory Affairs, filed October 18, 2006, Matrix advises the Commission of the Company's desire to do business in South Carolina using the d/b/a name of Matrix Business Technologies. According to the Company, Matrix Telecom, Inc. will continue to be the holder of the Certificates of Public Convenience and Necessity, will continue providing the services for which the Company's authority was granted, and will continue to be the entity responsible for all regulatory issues. According to Matrix, the addition of the requested assumed name is for the purpose of marketing to the public. Matrix adds that the Company will submit revised tariffs reflecting the d/b/a of Matrix Business Technologies if approved by the Commission.

On December 1, 2006, by letter, the Office of Regulatory Staff (ORS) advised the Commission that ORS does not oppose Matrix's request to adopt the name of Matrix Business Technologies. At its regularly scheduled meeting on December 6, 2006, the Commission reviewed the case before it, and after due consideration, the Commission concluded that the request of Matrix for approval of an addition of a trade name to the Company's name should be granted.

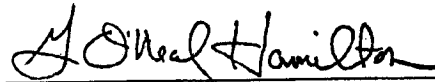

The Commission's records will hereby be amended to reflect Matrix's adoption of the trade name of Matrix Business Technologies.

IT IS THEREFORE ORDERED THAT:

1. Matrix Telecom, Inc.'s request for approval of the addition of "doing business as" (d/b/a) or trade name to the Company's name is approved, and Matrix Telecom, Inc. is hereby authorized to utilize "Matrix Business Technologies" as a trade name for its telecommunications services in South Carolina.

2. This Order shall remain in full force and effect until further Order of the Commission.

BY ORDER OF THE COMMISSION:

G. O'Neal Hamilton, Chairman

ATTEST:

C. Robert Moseley, Vice Chairman

1.7 Interruptions in Service

An interruption is deemed to have occurred when the phone lines of the underlying carrier are inoperative. If a Customer reports a facility, service or circuit to be inoperative but declines to release it for testing and repair, it is considered to be impaired, but not interrupted.

1.7.1 Temporary Suspension for Repairs

The Company's underlying provider shall have the right to make necessary repairs or changes in its facilities at any time and will have the right to suspend or interrupt service temporarily for the purpose of making the necessary repairs or changes in its system. When such suspension or interruption of service for any appreciable period is necessary, the Company will give the Customers who may be affected as reasonable notice thereof as circumstances will permit, and will perform the work with reasonable diligence, and if practicable at times that will cause the Customer the least inconvenience. When the Company's services are being repaired or changed, it shall take appropriate precautions to avoid unnecessary interruptions of Customer's service.

1.7.2 Credit Allowance for Interruptions

- A Interruptions of more than 24 hour periods which are reported to or detected by the Company, and which are not due to the negligence or willful act of the Customer are credited to the Customer at the pro rata monthly charge involved for each twenty-four hours or fraction thereof of interruption. - B For calculating credit allowances, every month is considered to have 30 days. A credit allowance is applied on a pro rata basis against the monthly recurring charges specified thereunder for local line or local trunk service and is dependent upon the length of interruption. 2.2 **Features**

2.2.1 **General**

The following features will be available on all lines. Not all features are compatible with certain key sets and PBX systems.

A **Call Forward**

This optional feature allows all calls directed to a telephone number to be routed to a user defined telephone number. The user is charged any applicable usage charges for the re-routed call. The user can activate/deactivate Call Forward and define a telephone number where all calls will be forwarded. Calls cannot be forwarded to an International Direct Distance Dialing (IDDD) number.

B **Call Forward Busy Line**

This optional feature forwards calls to a busy station to a predetermined number. Calls cannot be forwarded to an International Direct Distance Dialing (IDDD) number. The user is charged any applicable usage charges for the forwarded call.

C **Call Forward Don't Answer**

This optional feature allows users to re-route a call to a predetermined station in the event that the call is not answered within a customer-specified number of rings. Users are charged for any applicable usage charges on the forwarded call.

D **Call Return**

Allows a customer to automatically redial the telephone number of the last incoming call to that line, regardless of whether the call was answered, unanswered, or busy. After the recall is activated, and unless the number is blocked as described below, an announcement of the number is provided to the customer, who then has the choice of either continuing the recall by entering a code, or terminating the recall by hanging up. If the redialed number is busy, a distinctive ring alerts the customer when the number becomes available. If the telephone number of the last incoming call has been blocked through the use of a service such as Caller ID Blocking, the number cannot be redialed.

2.2 Features

2.2.1 General

K Hunting

This optional feature routes a call to an idle line in a prearranged group when the called telephone number is busy. Typically this feature is used with the customer's main telephone number and several subtending lines so that the customer can receive calls on several lines, although all calls are placed to the same number. Hunting will not work with Call Forward Busy and Don't Answer

L Remote Call Forward

Allows the Customer to automatically forward calls from one telephone number to another. The Customer is charged any applicable usage charges on the forwarded call.

M Third Number/Collect Blocking

Allows a Customer to block calls from being billed to individual stations, either on a third-number basis, or on a collect basis.

N Three Way Calling

Allows a user to add a third party to an existing conversation without expensive conferencing equipment. This feature also allows a user to place a call on hold in order to make a consultation call on the same line. When the consultation call is completed the user hangs-up or depresses the flash key on the telephone and is reconnected to the original conversation.

O Toll Blocking

Allows the user to restrict long distance outgoing calls on each line equipped.

SECTION 2 – SERVICE DESCRIPTIONS
(CONT'D)

2.10 Direct Inward Dial (DID) Service¹

2.10.1 DID Service is an optional feature which can be purchased in conjunction with Company-provided PBX trunks. DID Service transmits the dialed digits for all incoming calls allowing the Customer's PBX to route incoming calls directly to individual stations corresponding to each individual DID number. Charges for DID central Office termination and DID number blocks apply in addition to charges specified for PBX Trunks. One additional termination charge applies for each DID-equipped PBX Trunk. Telephone numbers are furnished in blocks of 20. Blocks of number groups will be determined at the sole discretion of the Company's resources. Whenever possible, the Company will attempt to provide telephone numbers arranged consecutively in a group, but will not guarantee nor accept responsibility for provision of such an arrangement within or between a block of numbers. In addition, the Company reserves the right to review vacant DID stations or stations not in use to determine efficient telephone number utilization. Should the Company determine, based on its own discretion, that there is inefficient number utilization, the Company may reassign the DID numbers.

2.11 Moves, Adds and Changes

2.11.1 Non-recurring Installation Charges as described in Sections 3 & 4 of this tariff will be applied per line when a Customer moves to a new address within the same local exchange.

2.11.2 Non-recurring charges as described in Sections 3 & 4 of this tariff will be applied per line when a Customer requests any changes or additions to an existing account.

¹ Where all numbers in a group have not been connected for service, the Customer is responsible for providing interception of calls to vacant or non-working assigned station lines or telephone numbers by means of attendant intercept or recorded announcement service. The Company will not terminate these numbers to an intercept message on the Customer's behalf.

2.12 Measurement of Service

- 2.12.1 When charges for calls are mileage sensitive, airline mileage is computed as described below. Calls are measured and rounded to the higher full minute from the serving wire center of the Customer's originating location to the serving wire center of the destination of the call, regardless of Company routing. The distance between the serving wire center origination point and that of the destination point is calculated by using the "V" and "H" coordinates as defined by Bell Communications Research (BellCore) and NECA Tariff FCC No. 4 in the following manner:

Step 1 Obtain the "V" and "H" coordinates for the originating and terminating wire centers.

Step 2 Obtain the difference between the "V" coordinates of each of the serving wire centers. Obtain the difference between the "H" coordinates.

Step 3 Square the differences obtained in Step 2.

Step 4 Add the squares of the "V" difference and "H" difference obtained in Step 3.

Step 5 Divide the sum of the squares obtained in Step 4 by ten (10). Round to the next higher whole number, if any fraction results.

Step 6 Obtain the square root of the whole number obtained in Step 5. Round to the next higher whole number, if any fraction is obtained. This is the airline mileage of the call.
